Over 700 visitor looked the model house during 3 years and 3rd house is under construction.

Construction Data

Materials

Activated EM solution and wood charcoal

Application Methods

13 tons of wood charcoal with EM treated was placed under the house basement.

No chemicals are applied, and EM was sprayed under the floor, floor, and walls.

Activated EM was mixed with concrete, mortar, and adhesive for interior cloth and sprayed on the painted place.

10 L of Activated EM for every 2 month was applied into the septic tank.
