

# EASY POOL CLEANING WITH EM

We can see so much difference !!! (AGEO primary school)

\*\*\*\*\*

## WITHOUT EM

## WITH EM

(JUNE 2002)

(JUNE 2003)

(How smelly !!!)

(No smell at all !!!)

So hard to clean !! We even need shovels !!

We can simply wash away the sludge !!! We need just deck brushes !!!

At 15:00 we are still working!!!

At 10:35 cleaning will be over soon !!!

#### (Merits of pool cleaning with EM)

- No chemical is required
- Time for the work can be shortened
- No foul odor in the pool
- We can work with bare feet

#### (When we should apply EM?)

- 1 month before the cleaning work

#### (What quantity of EM to be applied ?)

- Apply EMAS (EM Activated Solution) or fermented rice rinse water at 1:10,000 against the quantity of water in the pool.

In Japan at the time of the year 2006, 855 primary schools and junior high schools were using EM to clean their swimming pools. EM treated water can help clean the river after discharged.
